

VISUAL ERP

Manufacturing Software
easy, flexible & functionally rich

The easiest, most flexible and functionally-rich manufacturing software on the market

VISUAL increases profits without increasing overhead.

VISUAL is the perfect combination of easy to learn and deep functionality. You will be able to serve your customers faster, with better information while at the same time increasing throughput, productivity and profits.

Your company's information at your fingertips

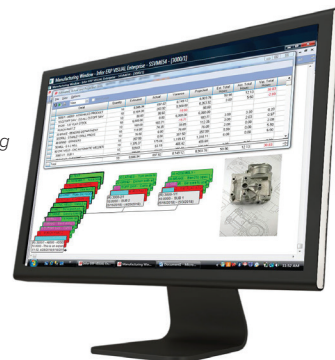

With VISUAL, you can see more at the click of a mouse than you could in hours with other ERPs. Whether converting a quote to an order, viewing Work Order cost detail, or checking the scheduled finished finish date for any customer's order, you can quickly get any information in micro-seconds.

Getting to your data is easy, fast, secure, and reliable

Eliminate "islands of information"

VISUAL spans a manufacturer's entire business cycle – from the initial prospect contact, through quoting, orders, manufacturing planning, purchasing, production, scheduling, shipping, all the way to costing and financials.

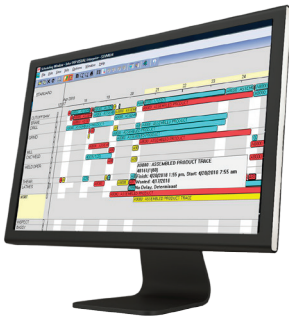

VISUAL Manufacturing window: See everything in one place

VISUAL includes advanced capabilities that typically are 3rd party add-ons with other ERPs. ECN/ECOs, Revision Control, Mid-WIP Inspections, RMAs, Lot/Serial Control, Dimensional Inventory tracking, PO Requisitions, AVLS, even Vendor RFQs, are all built in.

VISUAL MANUFACTURING

VISUAL Scheduling window: Deliver on time, every time.

VISUAL flexibly changes with your business needs, handling a mix of manufacturing environments concurrently now, or in the future:

- Projects
- Engineer to Order
- Make to Order
- Configure to Order
- Assemble to Order
- MTO/MTS
- Make to Stock

VISUAL enables Multi-Company/Multi-site processing in a single database. This allows easy, online visibility of inventory, material supply and demand, even production schedules across different plants or entities in a single system.

Companies using VISUAL gain a distinct advantage over their competition.

Price:

Accurate, true, actual cost information so you can quote or set prices with complete confidence. Throughput Tools, allow you to see how to best prioritize production to maximize your profitability for a given day, week, or month.

Delivery:

Keep your Customer promises, even reduce your lead-times further, and still have the fastest response time in your industry, using VISUAL's patented scheduling tools: Infinite, Finite, Forward, Backward, and Lean Scheduling gives you the tools needed to execute on time, every time. Know what's late – a mouse click uncovers why it's late – is it a bottleneck caused by people, machines, or material and how to fix it immediately to get the work back on schedule

Quality:

Whether you need to comply with Quality Management standards (ISO9001, AS9100, ISO 13485, etc.) or just believe – like Deming did – that better quality means higher productivity, lower costs, and happier customers, then you will love what VISUAL can do for your company's reputation. VISUAL helps manufacturers comply with all Quality Assurance standards by providing the tools for Total Quality Management Improvement Programs:

- Customer Feedback (how do our customers rate us)
- Supplier Performance and Rating
- Employee involvement and input
- Inspection: incoming, in-process, Final Assembly & Test, etc.
- Non-Conformances/Corrective Action Reporting and Management
- Equipment Maintenance – planned and unplanned
- Gage and Tool Tracking and Calibration
- Material Defects
- SPC/RRNOVA/FEMA's, and more

Every company wants to improve Business Performance. Contact us today to see what VISUAL can do for you
