Lean assessment tools enable an overall audit of the performance of your Lean practices. A Lean Maturity Assessment gives your organization an honest evaluation of the current effectiveness and progress made towards implementing and sustaining Lean in your facility. Whether your organization is new to Lean, or you are looking to strengthen your existing Lean Program, a documented assessment creates an action plan by identifying opportunities for improvement.

Lean Maturity Assessment Measures

Six-Dimensional Model

- Leadership** – How engaged is the management team in the application of Lean principles.
- Support Systems** – How Lean is supported by the other systems in operations.
- Value Stream** – How widely are processes and value streams understood and used to identify and eliminate wastes.
- Continuous Improvement** – How collaborative teams are in fostering a culture of continuous improvement.
- Lean Techniques** – How widely lean techniques are understood and practiced.
- Standard Work** – How well is Standard working being documented, displayed, used for training purposes & updated.

Benefits of an Assessment

- Evaluates the gaps in performance.
- Develops a sustainable Lean culture.
- Identify Improvement Opportunities.
- Creates a strong environment to improve.
